FEATURES

Endurel All Season Hammer Union Seals are designed and engineered for the North American Oil and Gas Industry, to stand up in all seasons and ensure optimal field performance.

- Manufactured using Low Temperature rated Nitrile Buna Rubber rated for -50°C to +120°C
- The superior NBR material allows the use of a single seal option regardless of the season to reduce confusion when selecting a seal option
- Available in standard and anti-extrusion (with brass ring) design
- Easily identified product with full traceability; certificate of conformance including cure, expiry date, and part number available for every seal
- Seals distributed through strategically placed distribution centers throughout Western Canada and the USA
- Volume stocking inventories - Topco carries a large volume of stock to meet your supply needs.
- Developed independently and exclusively for Topco Oilsite Products Ltd. and the Endurel brand (proprietary materials)
