# ENDUREL POSITION INDICATOR

North American Manufactured • Patent Pending

ENDUREL POSITION INDICATOR

## Key Features and Benefits

- Helps determine the position of a valve from a distance
- Removes operators from having to physically visit the location of the valve to determine the position
- Reduces the likelihood of costly errors such as valves being in the wrong position or out of alignment
- Bar cap models are designed with quick release magnets for ease of greasing
- Can be installed on all types of actuators
- Assembly made from Robust Urethane Material
- Light Weight
- Embedded Reflectors for visual aid
- Easy to install and remove
- Self-aligning hardware
- Saves time and money
- Improves Safety

## Ordering Information

Description		
08181410DS	Position Indicator Assembly	Generic Fits All
08181410DS-1	Model DS-1 Hardware	Square Shaft (1X2" Hydraulic Actuators)
08181410DS-2	Model DS-2 Hardware	Round Shaft (2" 3" Hydraulic Actuators)
08181410DS-3	Model DS-3 Hardware	Plate Manual Wheel Operator (DT-36/FMC Version)
08181410DS-4	Model DS-4 Hardware	Plate Manual Wheel Operator (SPM, MSI, Kemper, Flow Valve Version)
08181410DS-5	Model DS-5 Hardware	Bar Operator (3" Plug Valve)
08181410DS-6	Model DS-6 Hardware	Bar Operator (1X2" Plug Valve)
08181410DS-7	Model DS-7 Hardware	Bar Operator (2" Plug Valve)
